SKILLS AND TOOLS

TypeScript, React, Next.js, React Native, Redux, MobX, TailwindCSS, Sass, GSAP, Three.js, HTML5, CSS3, Python, Node.js, Java, PHP, Laravel, Wordpress, Sanity, PostgreSQL, MySQL, MongoDB, Firebase, Docker, Photoshop, 3Ds Max, Blender, Figma, Canva, GitHub, npm, CursorAI, Claude

HOBBIES

bass guitar, automotive, music, traveling, technology, foreign langs

ABOUT

Creative fullstack developer with hands-on experience in web and mobile applications, internal systems, and 3D. Well-versed in the medical industry - from organizing national and international congresses and conferences to dedicated software: document processing pipelines, mobile apps, VOD, virtual booths, improvements and updates to existing systems, on-site and on-the-road IT support. Built an NFT auction system and dApp tied to a 3D MOBA game on Unity. From VanillaJS through frontend and backend frameworks, relational and non-relational databases to Docker - comfortable across the full stack, integrating AI/LLM models. Particularly drawn to creative frontend and WebGL. Personally passionate about modding and creating useful, unconventional solutions.

EXPERIENCE

2SIMPLE

Sep 2025 - Present

Fullstack Developer

Remote

React • TailwindCSS • Python • PostgreSQL • TypeScript • MobX • Git

- Developing tools and pipelines for processing and transforming digital documents and scans
- Building dedicated applications and solutions for clients in the medical sector

BUSINESS SERVICE GALOP

May 2024 - Aug 2025

Front-End Developer

Hybrid

PHP • MySQL • Laravel • React Native • Vanilla JS • TypeScript • Next.js • TailwindCSS • Git

- Updated and expanded the internal event management system with new functionalities, system optimizations, and bug fixes; designed a new participant zone integrated into the event websites; created a dedicated system instance tailored to the needs of a major client, supporting diverse medical courses and events
- Developed a management system for the Endoscopy Section and a VoD platform for purchasing and accessing recorded conference content, dedicated front-end solutions for medical events (customized registration forms and websites, participant zones, API integrations) and responsive mailings compatible across all major email services
- Developed a mobile application for Zebra data collectors and a web application for attendance tracking during event sessions, supporting both self-scanning kiosks and Zebra scanners
- Built a customizable live voting application with an administrative panel and real-time results; developed virtual exhibitor booths with documentation for partner companies
- Provided onsite IT support during events across Poland, ensuring smooth operation of software systems and hardware reliability; assisted event participants when needed, including at international conferences; represented the IT department during international meetings and occasionally served as a company driver

ANFATA GAMES

Sep 2022 - Aug 2023

Junior Web3 Frontend Developer

Hybrid

Next.js • TypeScript • GSAP • Sanity CMS • Moralis • Firebase • Web3 • TailwindCSS • Git

- Developed a decentralized application integrated with Smart Contracts and ImmutableX collections, including building a marketplace, bridging NFTs between L1 and L2, enabling transfers between accounts, and implementing a live auction system.
- Worked with Moralis and Firebase databases and cloud functions, using TypeScript, Next.js, GSAP, and version control systems like GitLab and Bitbucket.
- Implemented a new homepage, integrated a Sanity CMS blog system, and built custom event-oriented websites and features across company platforms.
- Performed manual testing of Pirates of the Arrland, including the 3D MOBA game and 2D strategic map components within the decentralized app.
- Collaborated closely with cross-functional and international team to deliver integrated Web3 experiences.

SELECTED PROJECTS

POLONEZ AUTODRIVE

JavaScript • Three.js • 3D Studio Max

An 80s/synthwave-style 3D coloring-book animation with dynamic color customization of the scene and displayed elements via a built-in GUI. Scene models were created in 3D Studio Max. Includes a beta arcade mini-game based on overtaking other vehicles.

repository web demo

VAT-OFF

JavaScript • Chrome Extension API • CSS

Chrome extension that shows prices excluding VAT when you hover over them on any website. Automatically detects prices and displays the net amount in a tooltip on hover. Supports 120+ countries with preconfigured currencies and VAT rates, and allows custom VAT rate and currency. Features a built-in VAT calculator (GROSS/NET). Available on the Chrome Web Store.

repository Chrome Web Store

SKOFTware - my portfolio

Next.js • TypeScript • TailwindCSS • React Three Fiber/Three.js • GSAP • i18n

My portfolio website — a playground for web experiments and testing solutions. Features a 3D scene built in React Three Fiber, transitions and animations in GSAP, and i18n for multilingual support. Also includes a built-in web version of my resume in Polish and English. A project in constant evolution, probably never leaving "WIP" status.

repository web demo

Yet Another Weather App

React • JavaScript • Sass • Vanta.js • Open-Meteo API

"Yet Another Weather App" — but different. The interactive interface features real-time weather simulation based on Open-Meteo data. Weather information displayed for a selected city or via map/geolocation. Currently undergoing a major rebuild, but feel free to check the weather.
